*On-going research to fuel and enhance Eclipse Steady*

Agenda

- Introduction & Welcome
  - Pierre-Yves Gibello (OW2) & Marco Jahn (Eclipse Foundation)

- MORPHEMIC Cloud computing optimization platform
  - Alessandra Bagnato (SOFTEAM)

- Validate your system architecture early by simulating with Eclipse POOSL
  - Jos Hegge (TNO)

- Wrap up
  - Marco Jahn (Eclipse Foundation) & Pierre-Yves Gibello (OW2)

We are recording...

The talks will be recorded.
Please mute your mic and turn off video if you wish to remain anonymous

Asking questions

- Please raise your virtual hand(*) in zoom

- Or add the question to the chat

Eclipse Foundation and OW2 Announcements

Eclipse Foundation and OW2 Announcements

CLOUD NATIVE TECHNOLOGIES

This track is about everything you need to know about developing cloud native applications including microservices. The topics include...

AUTOMOTIVE & MOBILITY

This track is new and reflects the constant increase of working groups and projects centered around Automotive and Mobility use cases....

IOT & EDGE

IoT development is expanding at a rapid pace, driving applications such as Industry 4.0; smart city, building automation, smart home, and...

ALL THINGS QUALITY & SECURITY

Whatever you're building and however you're building it, the testing, quality, and security of your code and processes is an integral...

JAVA

Java is moving forward faster with a rapid release model. Every new Java version promises interesting features and updates. Eclipse is...

WEB & DESKTOP TOOLS & IDES

Some of the most influential developer tools and IDE platforms are Eclipse projects. ...

THE OPEN SOURCE WAY

The freedom of open source software to use, study, modify, distribute and redistribute code is becoming indispensable for companies,...

MODELING TOOLS & TECHNOLOGIES

Many projects from Eclipse are supporting the creation and deployment of modeling tools and low-code/no-code environments. Contributions...
